REMARKS

25X1X

Forty twin-engine aircraft were still parked at the Strausberg (N 53/V 15) airfield. There has been no flying during the previous two weeks. There was only little military activity at the field.

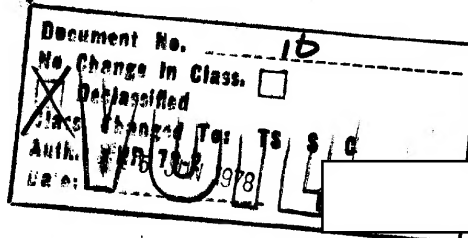

25X1A

Comment:

The number of aircraft stationed at the field has not changed compared with observations made in November and December 1949. It is, therefore, assumed that a bomber regiment is still stationed there.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
